PROFILE

Senior Full-Stack Developer with 10+ years shipping user-facing products at fintech and SaaS start-ups and scale-ups. I own features end to end, from shaping the problem with users and product through to the UI, API and data model behind it. Strong in TypeScript, React, Next, Vue and Nuxt, with backends in Kotlin and C#/.NET. I've built AI features people rely on every day, including a natural-language chatbot over internal research data and a document-extraction tool that cut processing from hours to minutes.

TECHNICAL SKILLS

Languages:	TypeScript, Kotlin, C#, Java, PHP, Python, SQL & HTML/CSS
Front-end Frameworks:	React, Next, Vue, Nuxt & Tailwind
Back-end Frameworks:	.NET, Kotlin (http4k, jOOQ), Node.js, Spring & Laravel
AI:	Claude Code, Claude, Gemini, Vertex AI, OpenAI & Azure AI
Mobile:	Xamarin/MAUI & Flutter
Cloud/Hosting:	Azure, AWS, Google Cloud Platform & Digital Ocean
Tools/Platforms:	PostgreSQL, Docker, GitHub Actions, Playwright, Puppeteer, Storybook & Umbraco

EMPLOYMENT EXPERIENCE

The Stream — London, UK
Senior Full-Stack Developer — March 2025 - Present

- Designed and shipped an AI chatbot that lets wealth and asset management clients query their research data in natural language. Clients have asked it thousands of questions, saving significant time finding and reviewing information.
- Built customisable dashboards so users can configure their own views, layouts, filters, charts and data to suit different research workflows.
- Built a Microsoft Word add-in in React and TypeScript that streamlined note ingestion into the platform, reducing manual effort and improving adoption among research users.
- Built and iterated on a CRM platform for wealth and asset managers, shipping full-stack features that improved key research workflows for internal teams and end users.
- Use Claude Code daily across implementation, testing and refactoring to ship features faster.

First Circle — (Remote), Philippines
Senior Full-Stack Developer — March 2024 - March 2025

- Delivered a document data-extraction tool (Kotlin, Azure AI, OpenAI) that turns PDFs and low-quality scans into structured data, improving accuracy and cutting processing from up to several hours to under 5 minutes per document.
- Built an individual verification platform in React and TypeScript with a Kotlin API, letting the internal team manage loan applications, offers and repayments and process many more individuals.
- Redesigned the customer onboarding app for sign-up and account creation in React, with a Storybook component library.
- Modernised legacy API and front-end projects, improving maintainability and delivery speed.
- Managed and mentored 3 junior developers, strengthening onboarding, improving technical confidence and helping the team deliver more consistently.

Asurafin Financial Technologies — Glasgow/London, UK
Senior Full-Stack Developer — March 2021 - March 2024

- Built the client, advisor, research and ops portals using Nuxt, Vue, Tailwind and Storybook, and the company website in React and Next.
- Built a Node.js document render service (Puppeteer, with a request queue to stay responsive under load) that produces every PDF sent to clients, from quarterly statements to tax reports.
- Developed Kotlin APIs using http4k, jOOQ and PostgreSQL to deliver regulated client reporting with a strong focus on accuracy and reliability.

- Led and mentored a team of 3 front-end developers, helping raise code quality, improve delivery standards and support team growth.
- Worked closely with clients and internal stakeholders to translate requirements into technical solutions, improving delivery clarity and reducing rework.

Drummond Central Newcastle upon Tyne, UK
Junior Developer → Senior Developer July 2016 - March 2021

- Progressed from Junior Developer to Senior Developer within 4 years, reflecting strong technical growth and consistent delivery.
- Built and maintained .NET web applications in C# and mobile applications in Xamarin for iOS and Android across multiple client projects.
- Built front-end applications in Vue and supported clients across support, delivery and iteration cycles.
- Led delivery on multiple client projects, working directly with stakeholders to translate requirements into working products.

British Engines Newcastle upon Tyne, UK
SharePoint Developer (University Placement Year) July 2014 - July 2015

PERSONAL PROJECTS

Pulse March 2026 - Present
Event discovery platform for London's independent venues, gigs and nightlife .NET, Nuxt, PostgreSQL, GCP

- Designed and built the whole platform on my own, from data model and ingestion to front end and deployment, using Claude Code throughout.
- Built a scheduled ingestion pipeline (.NET, Hangfire) that pulls events from Skiddle, Gigantic, Fever and WeGotTickets, then deduplicates and standardises them into one data model.
- Location-based "near me" and neighbourhood search using PostgreSQL and PostGIS, with a server-rendered Nuxt front end.
- Playwright end-to-end tests run before every deploy, with GitHub Actions shipping containerised services to Google Cloud Run.

Portfolio (josephpickering.co.uk) Nuxt, .NET, Vertex AI

- Built as a product in its own right: Nuxt 4 front end, .NET 8 API, AI search over my projects through Vertex AI, Auth0 and a CMS.

Intros Flutter, Laravel

- Mobile game where you guess a song from its intro, plus multiple small full-stack projects.

EDUCATION

BSc Computer Science Newcastle University
*First Class Honours (**74.3%**)* Sept 2012 – 2016

A-Levels Rawlins Community College
Mathematics (B), ICT (B), Economics (B) Sept 2010 – July 2012

GCSEs Rawlins Community College
11 GCSEs and equivalents including Mathematics, English & Science A-C* Sept 2008 – July 2010

OTHER ACHIEVEMENTS

- Completed the Great North Run six times, raising money for UK health charities.
- Provided supervision and tutoring for university Computer Science students.

OTHER INFORMATION

Nationality:	British
Driving Licence:	Yes
